

# **EMERGENCY COMMUNITY MEETING**

## **SAVE COYOTE CREEK**

**On November 18, the Sacramento County Board of Supervisors unanimously approved the Coyote Creek Agrivoltaic Solar Project that will:**

- kill over 3000 native oak trees
- destroy sensitive and increasingly rare habitat (vernal pools, valley grasslands, and one of the last continuous blue oak woodlands in California)
- destroy cultural resources that are unique, sacred, and irreplaceable to local tribes
- set a precedent for poorly-sited development that conflicts with local and regional plans in Sacramento County.

**Join environmental and OHV activists to stop this project.**

**Community Meeting**

**Tuesday, December 9, 2025**

**6:00 – 8:00 PM**

**Shepard Garden & Arts Center**

**3330 McKinley Blvd**

**Cal4Wheel | California Native Plant Society | Defenders of Wildlife | Habitat 2020  
Environmental Council of Sacramento | Sierra Club Mother Lode Chapter**
